CAPE MAY, NJ - On May 8-10, 2013 the Partners for Connections in Education (P4CE) will be presenting the Bridges Conference 2013: Connecting Higher Ed and K-12 at the Cape May Convention Center. The Bridges Conference will showcase unique partnerships and projects that are helping higher education and K-12 to work together on enhancing the continuum of available educational opportunities for students of all ages.

More and more the lines between college and high school are being blurred by the creation of innovative educational programming. Emerging technologies provide unique opportunities to create collaborative work space and the colleges and universities have many resources and programs with logical links to K-12 schools. These partnership opportunities can assist K-12 schools in better supporting their students by understanding the culture & demands of higher education institutions and can enrich the K-12 curriculum through these creative partnerships with colleges & universities.

The conference will feature many innovative programs that look beyond the traditional institutional role on behalf of high student achievement and the development of creative and innovative students through economically feasible programs and projects between colleges and

K-12 school. The conference will also feature Keynote Sessions from Hall Davidson from the Discovery Educator Network, Steve Zalot from Apple Computers and Melanie Andrich from Eduventures. Special Topic Sessions and small group “hands on” presentations will also be available throughout the conference. The Bridges Conference is co-sponsored by Wilkes University, PLS-Third Learning, Discovery Education and the Chester County Intermediate Unit.

For the complete conference agenda and to register for the Bridges 2013 Conference visit the P4CE website at www.p4ce.org and click the register today link.
